FINANCIAL YEAR: 01 JULY 2024- 30 JUNE 2025

1. Introduction

A Performance Plan is a strategic management tool that enables the performance of the employee to be assessed in an objective and fair manner. It defines the Council's expectations of Municipal Manager's Performance Agreement to which this document is attached and Section 57(5) of the Municipal Systems Act, which provides that performance objectives and targets must be based on the key performance indicators as set out in the Municipality's Integrated Development Plan (IDP) and as reviewed annually.

This Performance Plan is composed of three distinct plans:

Output Plan

The Output Plan in a plan of what outputs the employee is expected to deliver on. The outputs are defined in terms of the tangible deliverables (product or service). The quality requirements include the standard of the product or service and the time frame within which it must be delivered. Finally, the indicator must reflect what evidence must be produced to demonstrate the delivery.

Competency Plan

The Competency Plan is a plan of what competencies (skills, knowledge and attitude) the employee must acquire to be able to perform and deliver on the set objectives effectively. It entails the determination of the gap between the required level of competence and the employee's actual level of competence.

Personal Development Plan

The Personal Development Plan is a plan of what development interventions will be undertaken to bridge the gap between the required level of competence and the employee's actual level of competence and thus bring the employee to the desired competency level.

2. Output Plan

2.1 Introduction

The Output Plan is a plan of what outputs the employee is expected to deliver on. It consists of the Key Performance Areas (KPA's), weighting, outputs, performance indicator, baseline information and a target. A Key Performance Area is a defined or demarcated area of performance. The outputs are defined in terms of the tangible deliverables (product or service). The quality requirements include the standard of the product or service and the time frame within which it must be delivered. The quality requirements are the standards which measure the quality of the service or product.

The baseline information is the current information which is used as a starting point from which performance will be measured. Finally, the indicator must reflect what evidence must be produced to demonstrate the delivery.

2.2 Key Performance Areas

The following are Key Performance Areas (KPA's) as outlined in the Local Government: Municipal Planning and Performance Management Regulations (2006) and the Municipal
